FullStack Developer

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience in designing, developing, and maintaining scalable web applications using the MERN stack and modern backend technologies. Proficient in Node.js, Express.js, NestJS, MongoDB, React.js, and TypeScript, with strong expertise in RESTful API development, database design, backend architecture, and performance optimization. Experienced in building end-to-end solutions, handling production issues, optimizing complex SQL queries, and collaborating with cross-functional teams to deliver high-quality software. Passionate about scalable system design, clean code practices, and continuous learning to drive impactful business solutions.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS

Frontend Technologies: ReactJS, NextJS, Redux, TailwindCSS, Bootstrap, Material UI, Responsive Web Design,

Backend Technologies: NodeJS, ExpressJS, NestJS, RESTful APIs, JWT, Kafka, Redis, Microservices, BullMQ

Databases: MySQL, Postgres, MSSQL, MongoDB, TypeORM, Mongoose, Database Design, FireBase

Tools & Platforms: Git, GitHub, GitLab, Postman, Swagger/OpenAPI, VS Code,

AI & LLM Integration: OpenAI API, Prompt Engineering, RAG Fundamentals, Vector Databases (Qdrant/PGVector), Embeddings, Semantic Search, AI Chatbot Development

Cloud & Deployment: Docker, GitHub Actions (CI/CD), Vercel, Linux Basics

PROFESSIONAL EXPERIENCE

Software Developer | **DoodleBlue Innovations**

June 2024 – Present | Hybrid - Chennai

- Developed and maintained scalable web applications using React.js, NestJS, Node.js, TypeScript, and SQL databases.
- Designed and implemented responsive user interfaces, reusable components, and frontend integrations with backend services.
- Built and maintained secure RESTful APIs, business logic, authentication, authorization, and role-based access control systems.
- Collaborated with cross-functional teams to gather requirements, develop features, and deliver high-quality solutions within project timelines.
- Optimized application performance through efficient database queries, API improvements, and frontend rendering enhancements.
- Investigated and resolved production issues, UAT/SIT defects, and system bottlenecks to ensure smooth application performance.
- Participated in code reviews, technical discussions, deployment activities, and release management processes.
- Contributed to both frontend and backend development, enabling seamless end-to-end feature implementation and project delivery.

PROFESSIONAL PROJECTS

Daikin

10/2024-08/2025

- Developed and maintained RESTful APIs and frontend features using Node.js, Express.js, React.js, and MySQL.
- Worked on multiple business modules including Vendor, Business, Finance, and Admin, each with unique workflows and permissions.
- Implemented role-based access control (RBAC), authentication, and authorization to ensure secure access across the application.
- Built reusable React.js components and integrated them with backend services for a seamless user experience.
- Collaborated with stakeholders to develop new features, resolve issues, and enhance existing functionalities.
- Optimized API performance and database queries, improving application efficiency and overall user experience.
- Technologies: React.js, TypeScript, Node.js, Express.js, MySQL, REST APIs, JWT Authentication

- Independently developed and maintained backend services and RESTful APIs using Express.js, implementing business logic, database operations, authentication, and third-party integrations.
- Built secure authentication and role-based access control mechanisms to ensure reliable and secure access across the platform.
- Collaborated with the frontend team in developing and enhancing the CMS application using React.js, contributing to UI implementation, API integration, and feature development.
- Developed and maintained APIs for both CMS and Public Website functionalities, ensuring seamless communication between frontend and backend systems.
- Worked closely with stakeholders to understand business requirements and deliver scalable technical solutions.
- Successfully delivered backend modules independently and contributed to the overall project delivery with minimal production issues.
- Technologies: React.js, TypeScript, Next.js, Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, Git, GitHub

ASB*01/2026-Present*

- Contributed to the development of a large-scale enterprise application built on a microservices architecture, supporting multiple business modules and workflows.
- Primarily worked on Admin Module and Pillar 5 Development, implementing backend services, REST APIs, dashboards, and reporting functionalities.
- Developed and maintained business-critical features using NestJS, TypeScript, MySQL, and TypeORM, ensuring scalability and maintainability.
- Worked on complex data processing, database operations, service integrations, and business workflows across multiple modules.
- Participated in performance optimization, query tuning, bug fixing, and release activities to maintain application stability.
- Collaborated closely with cross-functional teams to deliver multiple releases on schedule while ensuring high-quality standards.
- Technologies: NestJS, Node.js, TypeScript, MySQL, TypeORM, REST APIs, Microservices Architecture, BullMQ, Git

EDUCATION**Bachelor of Engineering (B.E) – Electronics and Communication Engineering**

Mohammed Sathak A.J. College of Engineering, Chennai (Anna University) 2020 – 2024 | CGPA: 8.2

LANGUAGES

- **Tamil: Fluent**
- **English: Fluent**
